NAVAL MEDICAL LOGISTICS COMMAND

FORT DETRICK

FREDERICK, MARYLAND 21702-5015

4200 IN REPLY REFER TO

Ser 04/02238

From: Chief, Bureau of Medicine and Surgery (MED-04)

Subj: STANDARDIZATION OF SYSTEMS AND VERSIONS TO SUPPORT
DEPLOYMENT OF DMLSS 2.0

1. Effective 1 October 1998, all Navy Medicine sites should be using only the following three major supply systems in their current version:
 - a. MICROMICS Version 3.3
 - b. CPD Version 3.2
 - c. PICS Version 5.9
2. Report transition to the current version of these systems to Mr. Stan Wade (swade@nml10.med.navy.mil), Naval Medical Logistics Command no later than 1 October 1998. Negative reports are required.
3. The Joint Medical Logistics Functional Development Center is working on data conversion programs to assist the services in migrating current logistic system data to the next DMLSS release. Standardization of programs and versions is critical to successful data migration. Failure to standardize will mean extensive work at each site in building catalog data.
4. Assistance and current versions are available from Ms. Linda Noel, lhnoel@us.med.navy.mil, Naval Medical Information Management Center who may be reached at (301) 295-0850 or from Mr. Stan Wade, Naval Medical Logistics Command who may be reached at (301) 619-7168.
5. My point of contact is LCDR William P. Bradley who may be reached at (301) 619-2084, DSN 343-3043 or email wbradley@nml10.med.navy.mil.

T. R. DEFIBAUGH
Assistant Chief for
Logistics
